THE RESPONDER

BREAKING GROUND

City Officials break ground for the construction of Alexandria's 10th fire station and revamped City impound lot. Pictured left to right: Fire Chief Adam Thiel, T&ES Director Rich Baier, Deputy City Manager Michelle Evans, State Senator George Barker, City Councilwoman Del Pepper and Vice Mayor Kerry Donley.

On October 13 the City of 210 and a new revamped western portion of Eisenhower Avenue as well as closer to constructing Alexandria's 10th fire station on work by the City to bring a Southwestern portion of the Eisenhower Avenue. Despite the brisk cold of the morning, City and State officials, firefighters and medical services, members of the community and the media attended the ground breaking ceremony for Fire Station 210. The new fire station will initially house a four person staffed Engine Company and a Paramedic unit. It will also house SEE FS210, Page 8, Col. 1

Make it Click

By Captain Troy Jennene Gibbs

I often wonder why so many drivers don't make it "CLICK". What I am referring to is use of the common seatbelt. Many of us are concerned about distracted drivers next to us texting or talking on the phone, yet we don't often give much thought to our seat belts. While we can't always determine our outcome on the roads we can reduce our chances of being ejected out of the vehicle and suffering severe traumatic injuries as a result of not buckling up!

Perhaps the emphasis is no longer on using seat belts because we have so many other issues on the forefront, i.e. aggressive drivers, drunk drivers, and texting drivers. The National Highway Transportation Safety Administration (NHTSA) states that those less likely to buckle up are men between the ages of 18 – 34. That includes a large portion of our workforce within the City of Alexandria. Despite the national campaign "Click it or Ticket" to make every driver aware of the benefits of buckling up; some habits are hard to die.

As you are reading this article are you saying I wear my seat belt at work because it is policy. But are you following through when you jump in the driver seat in your personal vehicle? Are you simply going down the road and figure you don't need to buckle up because you're not going very far? You think since that belt is uncomfortable you

don't feel like wearing it? Data shows that seat belts save 13,000 lives yearly.

Without a seat belt you become a projectile in the front seat. Driving un-secured makes it

easy to lose control because you tend to slide around in your seat.

Let me share a story about why I wear my seat belt EVERY time I get behind the wheel. I sit in the driver seat and purposely take 5 seconds to remind myself about why I buckle up. In emergency services we see the results of what can happen when we don't make it "click" when we get behind the wheel. Many years ago I was on the ambulance crew in my college town when a call came out for an auto accident. Of course it was a cold, dark and wet week-end night.

Despite the weather students were willing to travel out to enjoy the football win and celebrate. The ambulance crew came upon the scene of the accident and

we prepared to care for patients on the scene, yet the student wasn't anywhere to be found. Her car had hit a tree and she was thrown down over the embankment some 30 feet away. She was not wearing her seat belt and now the police officer had to call her parents to deliver the bad news that their 18 year old daughter who came to school to learn was now laying in the morgue. This story repeats itself over and over throughout America each year.

Remember every time you get behind the wheel be sure to take a second to make it "click" so you can be around to see another day. It really is just that simple.

VOSH Not Pursuing Issuance of Citations

On November 14, the Department received a letter from the Virginia Department of Labor, Industry's Office of Occupational Safety and Health (VOSH) concerning the February 8, 2012 incident which lead to the line of duty death of Paramedic Josh Weissman. In the letter VOSH stated that it *"is not pursuing the issuance of citations against the City of Alexandria Fire Department"* relating to the February 8 incident. VOSH identified a number of factors that may have contributed to the events that occurred that night including weather, roadway conditions, scene lighting, etc. VOSH has recommended several actions which will be incorporated into the upcoming After Action incident review later this year. 🚒

Fire News

Job Based Performance Drills

As the Department entered the Fall season, firefighters and medics were tasked with Job Based Performance Drills. The drills, held several times each

performance and help employees improve in areas identified during the drill.

Mid-Point Pump Operator Training

Members of the 39th Recruit Class participated in Mid-point Pump Operator training in November. The program was designed to have each firefighter from the 39th Recruit School perform a series of pump evolutions as the first arriving Engine Company and the water supply Company.

Field Training Program

In December, Lieutenant Wells Wilson introduced field supervisors to the new Field Training Program. The program, which Lt. Wilson is charged with developing, includes several key goals:

- Increase regularity of shift training;
- Develop consistency of skills;
- Improve documentation to meet compliance requirements of stake holder organizations;
- Provide training resources to company officers and firefighters.

The Victim Rescue and Drag is one of several stations firefighters must complete during the Job Based Performance Testing.

year are designed to measure employee performance when doing tasks associated with their job class. Firefighters participated in the drills beginning in late October and ending by mid November. Timed exercises while in full firefighting gear and breathing apparatus included a ladder carry raise; forcible entry simulation; high rise pack carry; hand line advance; pike pole simulation; equipment carry; and victim rescue and drag. In addition to completing the drill, firefighters remained on air in order to complete an air consumption study being performed by the Department. Results of each drill was tallied and the results were provided to each participant. The drills are designed to provide feedback on individual

Each recruit was evaluated on their knowledge and proficiency on each of the tasks assigned. As the recruits, who are assigned to the City's fire stations, progress through their post graduation training requirements, these skills will be part of their final grading before coming

As the program moves forward there will be a Lieutenant assigned to each shift who will be the shift Field Training Officer (FTO). The Lieutenants are anticipated to begin

work in their new roles in the Spring of 2013. In addition to their training roles, the FTOs provide assistance to returning AFD members after a prolonged absence, support

EMS News

Thank You From One of Alexandria's Youngest.

Members of Engine Co. 206 and Medic 208 pose with the Dalton family. Pictured (L to R) Nathan Krause, Mario Weber, Ashley Dalton, Douglas Dalton, Grady Dalton, Chizoba Okoli, Ricky Muse, Jr. and James Taylor. Not Pictured: Elizabeth Fox.

On October 26, 2012 members of Station 206 had a visit from one of Alexandria's youngest residents to say thank you.

Ashley and Douglas Dalton, along with their newborn son, Grady, paid a visit to medics and firefighters at Fire Station 206 to say thanks.

On the morning of September 25, 2012, Ashley Dalton was expecting the birth of her first child. The Daltons originally planned to go to George Washington Hospital to give birth but at the urging of the Dalton's mid-wife they called 9-1-1. Medics from Station 208 and firefighters from Engine 206 responded to the

call. Upon their arrival they encountered Ashley about to give

birth in the very near future. Placing her on the ambulance cot and loading her in the back of the ambulance, the Medics proceeded to transport Ashley to INOVA Alexandria Hospital. The ambulance had traveled about 50 feet when everyone realized Grady was going to make his appearance any second. The ambulance pulled over and within 3 minutes Grady Rhys was born.

Ashley had high compliments for the medics and firefighters: "The crew who responded to us was incredible. Not only were they professional, but they stayed

very calm and never made me feel like we were in a dire situation. I felt very confident in their ability to handle what they were facing. Despite it not being the birth we had anticipated, it was still very special and memorable." said Ashley.

A month later the Daltons and Grady met the crews of Medic 208 and Engine 206 at Station 206. The Daltons thanked each member of the crew for everything they did that eventful morning on October 26.

Personnel who responded to the Dalton's aid were:

Medic 2 Mario Weber, Medic 2 Elizabeth Fox, Lieutenant James Taylor, Firefighters Nathan Krause, Chizoba Okoli, and Ricky Muse, Jr.

Congratulations to all on a job well done.

New Ambulances On Order

The Department recently purchased four ambulances from Laake Enterprises, Inc. (FESCO). Three of the units will replace front line ambulances. The fourth is slated to be assigned to the new Station 210.

The purchase of the ambulances is a product of a multi-year team effort that involved members throughout the Department.

The ambulances are scheduled to arrive in the Summer of 2013. 🚑

Community Engagement

October through December kept the Department very busy in the community for a number of worthy causes. October kicked off Fire Prevention month. Firefighters and Medics visited 22 public and private schools bringing valuable fire safety messages to 4th grade students. The Department staff were well received and tasked with answering numerous questions from the energetic students.

On October 12th members of the Department and the community gathered once again at Ivy Hill Cemetery for the annual Wreath Laying and Memorial Service for fallen members of the Department. This year was much different as members remembered the loss of Paramedic Joshua Weissman who died in the line of duty in February of 2012 and is buried in the Circle of Honor at the cemetery. Clear skies and warm weather was present to aid in making the ceremony a success.

On October 13 the Department opened its doors to the community as all nine fire stations hosted open houses from 10am to 4pm. The sunny Fall weather brought hundreds out to visit the

Sparky and Captain Tony Washington greet visitors at Station 204.

fire stations, tour equipment, learn about fire safety and interact with staff. Each year the community has embraced this event which is aimed at raising awareness of fire safety as well as educating the community about the Alexandria Fire Department.

Members of the community gather outside Station 202 for AFD's Annual Open House

Awareness t-shirts. The shirts, which were worn by AFD staff in October, raised needed funds for women who need mammograms and cannot afford them. Sales of the shirts were given a tremendous boost by singer and songwriter Roberta Flack when she performed at the Kennedy Center in late October. Numerous AFD members attended the concert, wearing their pink shirts which filled the orchestra section. Flack, a long time friend of Assistant Fire Chief Denise Pouget, said she was more than willing to do her part to promote the cause of Breast Cancer Awareness and prevention. Flack told firefighters "This is amazing. This is amazing that this can happen at a fire department."

Singer / Songwriter Roberta Flack (l) poses with Fire Chief Adam Thiel (c) and Captain Rodney Masser (r) after being presented her AFD pink helmet and t-shirt in support of Breast Cancer Awareness.

After the concert, the singer songwriter met with AFD staff.

SEE COMMUNITY, PAGE 6, COL. 3

October was also Breast Cancer Awareness Month and AFD's own Captain Rodney Masser led the charge again this year by designing and selling AFD pink Breast Cancer

Emergency Management News

City of Alexandria assists New York during response from Hurricane Sandy Responders deployed to state Emergency Operations Center

By Justin Pierce

Deputy Emergency Management Coordinator/Regional Planner

November 8, 2012. City of Alexandria Office of Emergency Management NIMS Officer, Brian Miller, reviews an Incident Action Plan (IAP) at the New York State Emergency Operations Center (EOC).

On October 30, 2012, a team of emergency management professionals from Virginia departed on a two-week deployment to New York where they worked as planning staff in the New York State Emergency Operations Center. These emergency management planners were tasked with gathering and reporting situational data related to the disaster response effort.

The team was comprised of two employees from the Virginia Department of Emergency Management (VDEM) and Jeff

Driskill and Brian Miller from the City of Alexandria's Office of Emergency Management (OEM). They were sent in response to a specific request from New York received through the Emergency Management Assistance Compact (EMAC), an agreement among all states to share resources during governor-declared states of emergency.

One of the many tasks that Jeff and Brian completed was the design and development of a system to track heavy equipment resources at the local emergency operation center (EOC) level, so that logistics could evaluate their capability to support the use of equipment, such as providing fuel, food, water, and housing for operators.

EMAC is a coordinated response system that allows states to send personnel, equipment and commodities to help disaster relief in other states. As needs are identified by disaster-impacted states, notifications are sent to other states through EMAC and responding states match the request to their available resources. The team returned to the City on November 12, 2012. +

Community, From Page 5

"You guys are amazing...You have civic responsibilities. You're firefighters. It's not like you're looking for something to do," she said.

Fire Chief Adam Thiel made Roberta Flack an honorary member of the Alexandria Fire Department when he presented her with her own pink helmet and pink t-shirt. She said she was honored that the Department included her in this worthy cause.

In November AFD members rallied to the cause of those less fortunate when they joined forces with the YMCA for their annual food drive. Members collected, sorted and delivered food to needy members of the community in time for Thanksgiving.

Melissa Gaskins of the YMCA summed the event up by saying "The Thanksgiving Food Distribution program was a success.

We were able to reach 150 families with our Thanksgiving Food Drive. We couldn't do it without you. "

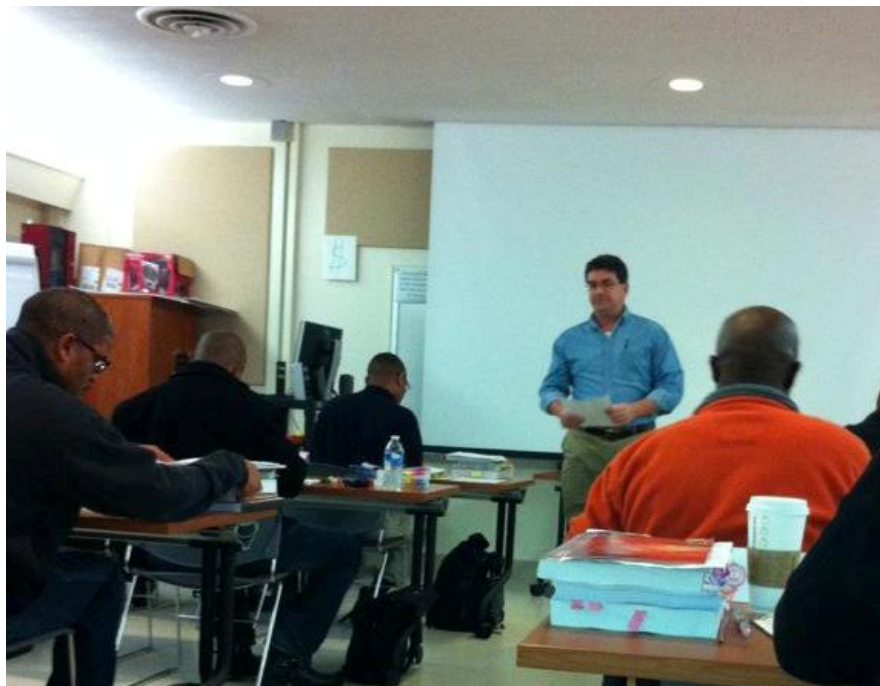

In December members again worked together to bring holiday joy to those less fortunate. The Department participated in three separate toy drives. The AFD Holiday Toy Drive founded by now retired Captain Paul Scafido and now under the leadership of Firefighter Michael Chandler gathered toys and gifts for **SEE COMMUNITY, PAGE 7, COL. 3**

Fire Prevention & Life Safety News

Teaching the Masses

FPS Supervisor Maurice Jones has been on the road a bit recently. Jones was tapped by the Virginia Fire Marshal Academy to be a guest instructor at

two new Deputy Fire Marshals. Leroy McFail and James Mikell were hired to replace the vacancies left by the departures of Bill Coates, who retired earlier this year and John Javelle, who took a position with the Washington

FPS Supervisor Maurice Jones instructs students on fire prevention inspections at the Virginia Fire Marshal Academy.

several Fire Inspector classes. Jones, who has written articles and published a book on fire prevention inspections, is in the process of being appointed as an adjunct instructor to the Virginia Department of Fire Programs Fire Inspector Inspections Program. In that capacity he will be responsible for teaching the essentials of fire code inspections to fire inspectors and fire marshals across the Commonwealth of Virginia.

New Faces

The Department recently hired

DC Metropolitan Police Department. Both men bring a wealth of prior experience with them into their new positions and will greatly add to the knowledge and experience within the Fire Prevention and Life Safety Section.

Finally, since the separation from the Department of Code Administration, all deputy fire marshals are now housed in office space at Station 209. The Assistant Fire Marshals remain at headquarters. 🚒

children under serious care at INOVA Alexandria Hospital. The drive also provided needed gifts to children at the Alexandria Women and Children's shelter.

The Black Fire Service Professionals of Alexandria (BFSPA) held their annual toy drive, providing gifts to over 100 children in need throughout the Alexandria community. Toys were distributed and lunch was provided by the BPSPA while the children visited with Santa.

Finally, the Department teamed up with other Northern Virginia fire departments in the annual Toys for Tots campaign. Over 10,000 toys were collected, organized and distributed to needy families in the Washington Metropolitan Area through the program.

Community engagement was very strong in the Fall of 2012! 🚒

ratus shop will be located on the main level to service SCBAs used by the Department and several other City agencies. A video studio is also slated to go into the station that will be used by several City agencies including the Department to produce professional quality videos for internal and external use. Finally, there will be meeting space located on the lower level that will be available for use by the community.

Fire, From Page 3.

the creation of incident After Action Reports, and respond to incidents in order to document the incident scene for training purposes.

The program utilizes existing positions creating a cost benefit for the Department.

Driver / Operator Pilot Program

In December the Department announced 36 firefighters who were selected to participate in

the new Driver / Operator Pilot Program. The program, developed in cooperation with City Risk Management is an in-depth training program which, upon completion will designate those attendees as Driver / Operators. The Driver / Operators will be assigned to specific stations and their primary role will be the operation and maintenance of an Engine or Truck. This is a change from the rotating driver assignments the Department has utilized for decades. The assigned employees will receive specialty pay for their position as the Department works towards the creation of a full time Driver / Operator rank in the career ladder.

Make Everyday Count in 2013

At the end of 2013 Operational Supervisors were tasked with defining seven operational objectives to be completed by the end of 2013. The lists were long and varied. After several discussions the lists were trimmed down and the agreed upon objectives for 2013 are:

1. Class A Foam Training
2. Station Management Plan Update
3. Full Implementation of the Field Training Officer Program
4. Completion of Phase I of the Pre-emergency Analysis Project
5. Completion of the Map Book Project

6. Implementation of the New Fire Boat
7. Full Implementation of EMS Training at the EMS Sim Lab.

New Apparatus Begins to Arrive

The years of work are finally paying off with the arrival of the first new piece of emergency equipment in November.

Alexandria's newest ladder truck, Truck 204, will be assigned to Station 204 on Powhattan Street.

The unit is a 2012 Spartan ERV 100-foot tractor-drawn aerial with a Gladiator EMFD Cab and a stainless steel body. The rig is powered by a 525hp Cummins engine and a 4000 series Allison transmission.

Features include a 15kw Harrison Hydraulic generator, Whelen Pioneer Plus 12-volt

Firefighters learn about the new features and equipment during one of several equipment orientation sessions held by the Department.

scene lighting, a Safety Vision Drive Cam and a SetCom wireless intercom. The unit carries 224 feet of ground ladders.

Personnel began training on the new truck in December. The truck will be in service in February 2013.

Construction of the 10 fire engines continues with delivery of the first set of engines expected by early Spring 2013.

Third Party Hose Testing

In December the Department contracted with Fire One, Inc. of Drexel Hill, Pennsylvania to conduct hose testing of all fire hose in the Department. The role of Fire One, Inc. is to ensure that fire pumps and hose are tested annually, safely and consistently. The use of a third party vendor also eliminated the need for fire companies to go out of service during the testing process, thus ensuring continued protection of the City in all locations.

A fully equipped reserve engine was made available to fire companies to use during the daily testing process. 🚒

The New Truck 204 is scheduled to go in service in February 2013.

Administration and Logistics News

New Fire Portal Makes Debut

On October 15, 2012 the Department's old web portal known as *Internal Combustion* was retired. The application was based on the former Lotus Notes platform that the City migrated from several years ago.

The Department has migrated the Master Calendar and Announcements functions to the new Office 365 SharePoint

Fire Portal. The new application provides the ability to schedule meetings and rooms through Microsoft Outlook and Outlook Web Access using the scheduling assistant. All Department staff can access the Master Calendar and Announcements at work and home.

A new General Order (GO 12-016) was issued which governs how the use the new features and scheduling available in the Office 365 SharePoint applications.

The move to SharePoint is designed to improve the scheduling of meetings and events affecting the Department as well as communicating important in-

formation to as many people as possible in a user friendly format.

The New Fire Portal

Recruit Training Well Underway

The 40th Firefighter-Rescuer Recruit Academy is well underway. Twenty-four people including two transfers from EMS are busy learning the basics of firefighting and rescue work.

At the time of publishing, they are doing their EMS rotations on the City medic units, learning the basics of EMS work and interacting with the station personnel. They will be returning soon to the Professional Development Center to complete their formal training and are expected to graduate in March 2013.

New Fireboat is Almost Here

The new fireboat which will re-

place the current Fireboat, the Vigilant, is almost complete. A team from the Department visited the factory in Canada in December and were satisfied with the progress to date. The boat will be sailed down to Alexandria sometime in March and placed in service after personnel are fully trained on all the equipment and operation of the vessel.

The Vigilant will be returned to Canada where it will be rehabilitated and sold to a new buyer.

Duty Vehicles on Order

At the end of 2012 the Department placed an order for 15 duty vehicles for use in Administration / Logistics, Fire Prevention and Life Safety, Emergency Management; and Emergency Medical Services. The vehicles are planned for use by duty staff who have been using vehicles that are well beyond their scheduled replacement dates. The current vehicles are subject to frequent repairs and general maintenance issues. The new vehicles will need less maintenance and be more reliable.

The duty vehicle replacements are part of a Department wide fleet replacement plan approved by the City Manager in 2012 which is designed to replace an aging fleet with standardized vehicles throughout the Department. The new vehicles are scheduled to be in service by late Spring 2013. 🚒

* In 2012 Support Unit 209 was unstaffed and personnel reassigned to Engine 209. Hazmat 209 picked up response calls for Support 209 in the majority of minor hazmat calls.

** In 2012 Trucks 203 and 204 were out of service multiple times with no reserve ladder trucks available. Staffing from Truck 203 or 204 were reassigned to Rescue 206 which was placed in service full time resulting in an increase in responses by Rescue 206. In addition, several engine companies went out of service at various times with no reserve fire engines available. Staff from Engine 204 were assigned to either a Suburban or to Rescue 206 and Engine 204 was used by the Engine Company whose front line piece was out of service.

Employee Service Awards

On November 29, the Mayor and Members of Council, along with the City Manager and Department Heads gathered at the Lee Center to recognize select employees at the annual Public Service Awards ceremony. City employees were recognized for benchmark years of service at 5 year increments beginning at 5 years through 35 years of public service. City retirees over the previous year also received recognition.

The following Department employees were recognized at the ceremony:

30 YEARS OF SERVICE

William C. Jordan
Thurston McClain
Reginald E. Rich
